HOW IT WORKS

InfoFort Fixed Assets Management solution implementation will

1

Create a new assets management operating procedure

2

Deliver a hierarchical assets classification structure for financial & physical tracking

3

Generate a detailed assets inventory covering assets' count, location, description and tag ID

4

Provide a clean assets' list cross matched with your financial database

5

Implement a user friendly asset management software enabling the automation of: Receiving, labeling, tracing and re-serializing assets, handling inventory inquiries and cycle count
